Expedited Electric Vehicle Charging Station Permit

Eligibility Checklist for Expedited Electric Vehicle Charging Station Permit:

Non-Residential Buildings and Facilities

A. Does the application include EVCS manufacturer's specs and installation guidelines? Provided Provi	Type of Charging Station(s)	Power Levels (proposed circuit rating)	Che	ck One
Level 2 – 3.3 kilowatt (kW) (low) 208/240 VAC at 20 or 30 Amps Level 2 – 6.6kW (medium) 208/240 VAC at 40 Amps Level 2 – 9.6kW (high) 208/240 VAC at 50 Amps Level 2 – 9.6kW (high) 208/240 VAC at 100 Amps Level 2 – 192 kW (highest) 208/240 VAC at 100 Amps Level 2 – 192 kW (highest) Provide rating: Provide rating: Provide rating: Provide rating: Y N N N N N N N N N N	Level 1	110/120 volt alternating current (VAC) at 15 or 20 Am	os	
Level 2 – 6.6kW (medium) Level 2 – 9.6kW (high) 208/240 VAC at 50 Amps Cher (provide Detail): Provide rating: Provide ra	Level 2 – 3.3 kilowatt (kW) (low)			
Level 2 – 9.6kW (high)				
Detection Provide Provide rating: Pr		•		
Other (provide Detail): Provide rating:				
Permit Application Requirements: A. Does the application include EVCS manufacturer's specs and installation guidelines? A. Is an electrical Load Calculation Worksheet: A. Is an electrical load calculation worksheet included? (CEC Article 220) B. Based on the load calculation worksheet, is a new electrical service panel upgrade required? 1) If yes, do plans include the electrical service panel upgrade? C. Is the charging circuit appropriately sized for a continuous load of 125%/ D. If charging equipment proposed is a Level 2 – 9kW station with a circuit rating of 50Amps or higher, is a completed circuit card with electrical calculations included with the single line diagram? Site Plan and Single Line Drawing: A. Is a site plan and separate electrical plan with a single-line diagram included with the permit application? 1) If mechanical ventilation requirements are triggered for indoor venting requirements (CEC625.52 {B or C}), is mechanical plan included with the permit application? B. Is the site plan fully dimensioned and drawn to scale? 1) Showing location, size, and use of all structures 2) Showing location of electrical panel to charging system		•

2) Showing location of electrical panel to charging system	B. Is the site plan fully dimension	ed and drawn to scale?	☐ Y	\square N
	1) Showing location, siz	e, and use of all structures	☐ Y	\square N
3) Showing type of charging system and mounting	2) Showing location of e	lectrical panel to charging system	☐ Y	\square N
	3) Showing type of char	ging system and mounting	☐ Y	□N

Compliance with the California Electrical Code:

	•		
A.	Does the plan include EVCS manufacturer's specs and installation guidelines?	Y	□N
	Does the electrical plan identify the amperage and location of existing electrical service		
	panel?	☐ Y	∐N
	1) If yes, does the existing panel schedule show room for the additional breakers?	☐ Y	□N
C.	Is the charging unit rated more than 60 amps or more than 150V to ground?	☐ Y	□ N
	1) If yes, are disconnecting mean provided in a readily accessible location and		
	shall be lockable open in accordance with CEC 110.25. (CEC 625.43)		
D.	Does the charging equipment have a Nationally Recognized Testing Laboratory	□ x7	□ N
	(NRTL) approved listing mark? (UL 2202/UL 2200)	☐ Y	□N
E.	If trenching is required, is the trenching detail called out?		
	1) Is the trenching in compliance with electrical circuit and feeder requirements		
	from structure to structure? (CEC Article 225)		
	2) Is the trenching in compliance with minimum cover requirements for wiring		
	methods or circuits? (burial depth per Table 300.5)		
	npliance with the Milpitas Municipal Code (MMC) sec. II-19-2.03 and Califording Standards Code (CGBSC):	nia Gr	een
A.	Does the CalGreen EV Readiness installation requirements apply to this project?	\square Y	□ N
	1) For new construction, does the plans demonstrate conformance with MMC	☐ Y	□N
	II-19-2.03 for the minimum required number of charging spaces?		
	2) For new construction, do the construction plans comply with the design	☐ Y	\square N
	requirements set forth in MMC II-19-2.03?		
	Do the plans clearly depict all required accessible EVCS features for the disabled?	□ Y	□N
	1) Do the plans identify the correct number and type of accessible EVCS stalls	☐ Y	□N
	required in accordance with Table 11B-228.3.2.1 ?		
	2) Do the plans detail compliance with the accessible EVCS features required by 11B-228.3, 11B-812, and Figure 11B-812.9?	☐ Y	□N
Note	es: This criteria is intended for an expedited EVCS permitting process. If any item checked NO, please revise plans to fit within the eligibility checklist: otherwise permit application may go through the standard plan review and approval procedure review may take up to 15 days from the complete submittal received date for expedited projects with <= 25 EV and up to 20 days for qualifying expedited properties. This review timeline is applicable to each cycle of submittal receives resubmittal is required to address plan review comments. Electrical plans shall be completed, stamped and signed by a California License Engineer or a C-10 electrical contractor.	e the ess. Pla qualify rojects ived wh	ying with nen
